The debate over whether you should delete cookies and cache continues, with plenty of opposing opinions found all over the web. Our own Gary Sims has a complete guide on the matter to help you understand, but the short answer is that while cookies and cache are suitable for keeping your phone speedy, these can also become corrupted and cause issues. It's good to give your devices a clean start from time to time. That's why today we'll show you how to clear data and the cache on Samsung gadgets. More: 10 ways to make your new Samsung Galaxy S22 better How to clear app cache and data on a Samsung phone or tabletRyan Haines / Android AuthorityClearing the app cache and data on Samsung devices is almost as easy as on other Android handsets, but the steps are slightly different with Samsung's One UI. Let's take you through the process. Open the Settings app. Go into Apps. Find the app you want to clear the cache and data for. Go into Storage. Tap the Clear cache button. If you want to delete data, hit Clear data. Select OK to confirm. How to delete browsing history, cookies, and cache in the Samsung Internet appMitja Rutnik / Android AuthorityClearing the app cache and data is one thing, but now you have to start cleaning up other areas of your Samsung device. Let's move on to the Samsung Internet app, which you're likely using to browse the web. You can take care of the history, cookies, and cache simultaneously. Open the Samsung Internet app. Tap on the three-line menu button in the bottom-right corner. Hit Settings. Go into Personal browsing data. Select Delete browsing data. Tap Browsing history, Cookies and site data, and Cached images and files. Additionally, you can opt to delete Passwords and Autofill forms. Hit Delete data. Tap on Delete to confirm. Note: These steps were put together using the Samsung Internet app (version 17.0.7.34). Keep in mind that steps might be different if you're running another app version. If you use Chrome: How to delete cookies and clear cache on Chrome How to clear app cache on a Samsung Smart TVDo you have a Samsung Smart TV? These usually come with less performance than smartphones and tablets, so it makes sense you'll want to clear some space and give your television a fresh start from time to time. Here's how to do it. Press the Home button on your remote. Select the Settings cog. Move to the Support tab. Hit Device Care. Your TV will do a quick scan. Find the app you want to clear the cache for. Press down and select View Details. Select Clear Data or Clear Cache. Confirm by hitting OK. Also read: The best Samsung Smart TV apps How to clear cookies and browsing history on a Samsung Smart TVAs crazy as it seems, Samsung Smart TVs have a browser; data can also build up if you use it extensively. Let's clean things up. Open the Internet Browser on your Samsung Smart TV. Select the Settings cog. Go into Web Browser Settings. Select General. Hit Delete History or Delete Browsing Data. Confirm by hitting Yes. Related: How to delete apps and save space on Samsung devices FAQs Should I clear the cache and other data?As mentioned above, cache, cookies, and other stored data can help improve and speed up your experience. This is because this data usually gets stored locally, so it doesn't have to be loaded every time you browse for it online. That said, all data can become corrupted. Additionally, you can collect too much data, depending on your habits. It's good to give your handset a clean start from time to time. How often should I clear the cache, cookies, and other temporary data?There is no straight answer to this question, but clearing data and cache on Samsung devices about once a month is a good idea. What can I do if clearing the data and cache doesn't help?Sometimes devices can't seem to speed up, no matter what you do. If you find yourself in this situation, you might want to consider a complete wipe (factory data reset). This gets your phone back to stock settings and cleans your whole storage. If this doesn't work, maybe it's time for a new device, or you could look into our post about common things that slow your phone down. SamsungSamsung Galaxy S22 Skip to content Manage consent error: Content is protected !! When you use a web browser such as Chrome, the websites you visit create files called cookies. These cookies save and track your browsing data but can pile up and slow down site loading times. That's why it's good to delete them regularly, and unlike the cookie jars we all enjoy sneaking into, emptying these caches won't add extra pounds. Here's how to delete cookies and clear cache on Chrome. Read more: How to clear cookies on a computer Cookies are automatic and provide benefits, such as keeping you signed in, remembering your site preferences, and giving you locally relevant content. So remember that removing cookies might forget your passwords and delete your saved preferences. The cache remembers parts of pages, like images, to help them open faster during your next visit. To clear the cache, click More at the top right of the browser, then More tools-> Clear browsing data.Adam Birney / Android AuthorityChoose a time range to delete, and check the boxes for Cached images and files and Cookies and other site data.Adam Birney / Android AuthorityTo delete cookies, first open Chrome on your computer. At the top right, click More->Settings. Select Security and Privacy from the left-hand side and Cookies and other site data.Adam Birney / Android AuthorityScroll down and click See all site data and permissions.Adam Birney / Android AuthorityFrom the following page, click Clear all data. Google will ask you to confirm one more time by clicking Clear.Adam Birney / Android AuthorityClick the trash can icon beside the website address to clear cookies from a specific site. Additionally, you can specify sites that are always or never allowed to use cookies at the bottom of the page. Change your cookie settingsIt's a good idea to take the time to manage your cookies settings so you are comfortable with the amount of information Google is collecting. Eventually, cookies on Chrome will be replaced with Google's FLoC protocol, but for now, you control which cookies to allow and which to block. Note that some sites that require you to sign in won't work if you don't allow cookies.Third-party cookies are created by sites other than the ones you visit. However, these sites own some of the content you may see, such as ads or images. If you only want sites you visit tracking you, it's good to block third-party cookies.Adam Birney / Android AuthorityAdditionally, you can tell Chrome to clear all cookies and site data when you close a window, to save you the trouble of manually doing it every time you're finished with the browser.You can also send a request to websites not to collect or track your browsing data. However, this request can easily go ignored, with many websites still collecting and using your browsing data. But it's still worth sending since some web services will respect your Do Not Track request and change their behavior accordingly. Open the Chrome app on your Android phone or tablet. At the top right, tap More-> History.Adam Birney / Android AuthorityFrom there, tap Clear browsing data.Adam Birney / Android AuthorityAt the top, choose a time range. To delete everything, select All time. Check the boxes next to Cookies, site data, and Cached images and files.Adam Birney / Android AuthorityLastly, tap Clear data at the bottom. Open the Chrome app on your iPhone or iPad. At the bottom right, tap More->Settings.Adam Birney / Android AuthorityTap Privacy->Clear Browsing Data at the bottom of the screen.Adam Birney / Android AuthorityCheck the box beside Cookies, Site Data. Uncheck the other items.Adam Birney / Android AuthorityFAQsShould I clear cookies on Chrome?Clearing your cookies and cache regularly is good hygiene for your computer to keep your machine clean. You should clear cookies every few months or so. What happens when you clear cache?After you clear cache: Some settings on sites get deleted. For example, if you were signed in, you'll need to sign in again. Some sites can seem slower because content such as images needs to load again. If you're signed into Chrome, you'll stay signed in on Google's websites. What happens when you delete cookies?When you delete cookies, you erase information saved in your browser, including your account passwords, website preferences, and pages visited. Deleting your cookies can be helpful to improve performance speed and keep your browsing history private if you share a device with other people. Can you clear cookies for one site Chrome?Yes. Within the Chrome browser, navigate to Settings-> Advanced Settings-> Content settings-> Cookies-> See all cookies and site data. From there, you can search for site-specific cookies to delete. Clearing all cookies will remove user preferences for the website, login information, shopping cart contents and identifiers for server-based sessions.
